

FLEXIBILITY

Deltacom SIMPLICI-T

Traveling at the Speed of Business.

**Business technology and communications today can be thrillingly fast,
but reliability and flexibility are still key.**

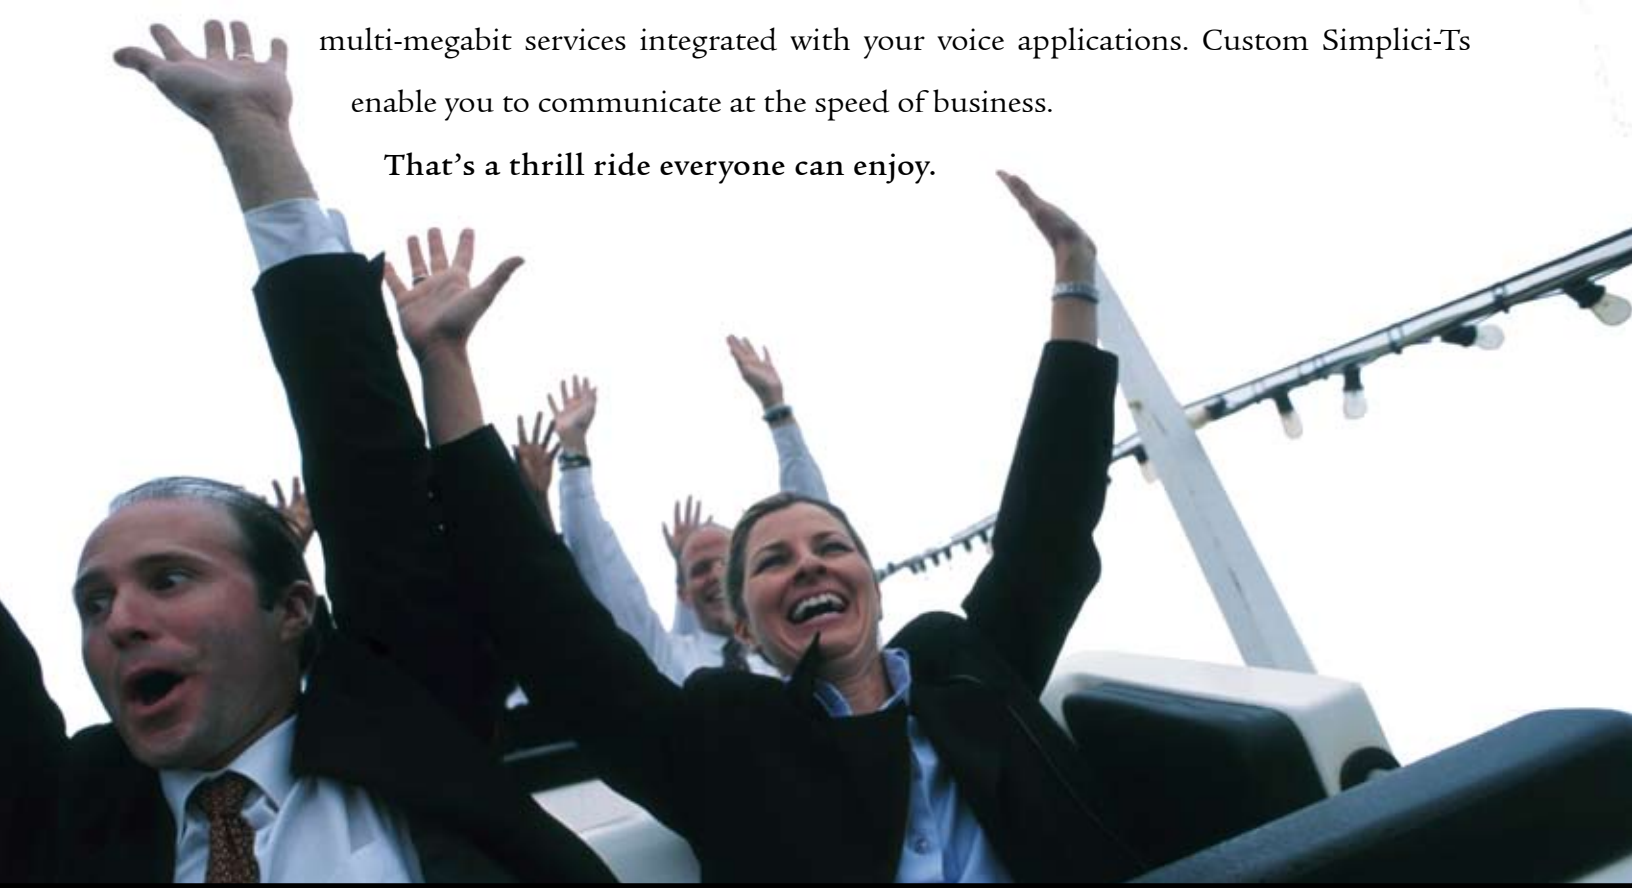

Deltacom knows that every company has unique needs and bandwidth requirements to enable maximum productivity while controlling cost. Whether you need tried and true basic phone services and high-speed data or even more robust, dynamic bandwidth prioritizing voice and data, Deltacom's staple Simpli-TSM packages offer the perfect solution.

Deltacom will define your needs, and tailor a scalable and reliable Simpli-T package that delivers peak efficiency for your business. Simpli-T provides:

- Flexible bandwidth to handle all voice and data, at speeds up to 6MB
- Cost-effective, bundled long distance and unlimited local calls
- Feature-rich Internet connectivity

Options range from a more traditional T-1 service with defined voice and data parameters to fast, multi-megabit services integrated with your voice applications. Custom Simpli-Ts enable you to communicate at the speed of business.

That's a thrill ride everyone can enjoy.

SIMPLICI-T CASE STUDY

A firm handling large email attachments and frequent downloads of large files over the Internet needed a higher bandwidth Internet solution. A Deltacom representative evaluated their business and, in addition to other communications needs, identified the requirement for consistently higher upload and download speeds than ADSL or a standard T-1 could handle. By utilizing a Simplici-T solution tailored for their unique IP specifications, the firm avoided the need to buy separate services or equipment and also enjoy the economic advantage of consolidating with one provider over one platform. Dynamic allocation of the bandwidth for their voice and data means employees enjoy faster uploads and downloads over a state-of-the-art network. But Simplici-T meant much more than just speed to this firm. Their increased productivity fueled their growth and actually impacted their bottom line. Deltacom uncovered much more than just basic communications services to truly drive this business forward.
